

100 Years Of Expertise

Pudumjee Hygiene has 100 years of expertise in speciality paper manufacturing that is best reflected in the imaginative differentiation of tissues. Differentiating factors that lend singularity and uniqueness to each tissue are the base sheet used, the format, number of ply, wet strength, bulk etc. Our hygiene solutions are manufactured to exacting specifications to suit not only their end use but also disposal methods. Hence, our toilet rolls disintegrate in water and towels remain strong in the kitchen even when wet. Facial tissues do not shred and napkins absorb twice their weight in water.

Meeting Global Standards

The use of tissue paper products in contact with food supplies sets higher requirements for the chemical and production processes. This applies to a wide range of tissue products for professional and home use. Careful control of the production process is the key to ensuring high microbiological quality and hygiene standard of the end products. Greenlime towels, napkins, toilet tissues and facial tissues use safe, high-quality food grade additives that are FDA-compliant.

Our tissue products are manufactured using imported or recycled pulp in advanced hands-free manufacturing units using FDA-compliant raw materials. The tissue is totally chlorine-free (TCF), hygienic and bacteria-free, and completely safe to use with food products and on the skin.

Our natural range of towels and tissues is made from 100% recycled fibres derived from high-quality, imported waste-paper grades and processed using environment-friendly hydrogen peroxide in pulp bleaching. We procure our base pulp from sustainable resources and not from wood cultivation, making our tissues environment-friendly.

Our dispensers can be a valuable part of any HACCP plan with mechanical hands-free features preventing cross-contamination. Hazard Analysis Critical Control Point (HACCP) is a global process control system designed to enhance food safety by identifying and preventing physical, chemical and biological hazards in food production.

Being a full member of ISSA, has given us access to global hygiene standard resources and recognition in the hygiene business as the most trusted business partner.

Pudumjee Hygiene has striven to earn prestigious ISO certifications for its units, making it the only tissue company in India with 3 ISO certificates

- ISO 9001: 2000 Certified for our Quality Management Systems (QMS)
- ISO 14001: 2004 Certified for our Environmental Management Systems (EMS)
- ISO 22000: 2005 Certified for Food Safety Management Systems (FSMS)

Available All Round The Year

Thanks to our own tissue-manufacturing and converting facilities, we assure all-year-round ready supply of our products and services. We have branch offices in all major cities of India. Our strong and efficient distribution network offers unbeatable service to our customers, making sure they have adequate stocks whenever required. Our unique on-call delivery system ensures we are there to cater to emergency needs of our clients.

Save The Earth

Natural Tissues

Pudumjee Hygiene enables corporates to have the best of both worlds — continue using tissues without contributing to ecological degradation. That is because many of them now use Greenlime natural towels and tissues, which are made from 100% natural fibre without endangering natural forests.

The tissues are derived from high-quality wastepaper grades imported from the USA and Europe. These are processed in a sophisticated recycling plant using environment-friendly hydrogen peroxide for bleaching, in a Total Chlorine Free (TCF) manufacturing process.

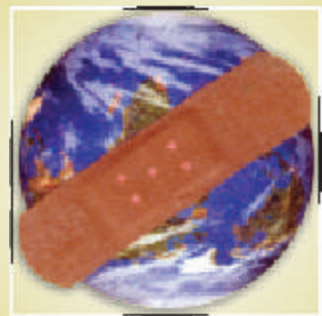

greenlime®

Superb Performance

Greenlime natural tissues are second to none in terms of performance and offer an international user-experience in terms of absorbency and application-specific wet and dry strength. The advanced, hands-free technology using safe and mild processing chemicals make Greenlime natural tissues extremely hygienic and bacteria-free, and safe on the most sensitive human skin.

Being an ISO-certified company, Pudumjee Hygiene adheres to best Quality, Environment and Food Safety Management Systems. All the inputs for manufacturing and packaging our tissue products are food-grade in compliance with FDA norms, making our products 100% safe on skin and food. ISO certification also opens up our units for secret inspections, keeping us ever-vigilant to serve our customers with assured quality products

Heal The Earth

Benefits Of Using Recycled Paper

One ton of recycled paper saves:

- 17 trees
- 1,752 litres of oil
- 26,281 litres of water
- 82.62 cubic feet of landfill space
- 264 kgs of air pollution
- 4,077 KW hours of energy

Greenlime Natural Range

C-fold Hand Towels

These pre-cut, extra-thick towel sheets are best known for their wet-strength (do not shred easily even when wet). Unique brand or logo embossing on the tissue sheets provide 100% quality assurance.

Salient Features

- Specially manufactured base sheet ensures towel remains tough even when wet
- Distinct embossing pattern for international look and better absorption
- Each towel is of consistent size and quality
- Unique brand logo embossing feature ensures quality consistency

Product Specifications

Code	Description	Unit / Roll Size	Packing	Case Count
01410019	Greenlime Super-green C-fold Towel	21 x 33 cms	150 towels	20 sleeves

M-fold Hand Towels

You don't need to grope for these soft and easy-to-use multifold towels due to unique interlocking design, which makes the next towel present itself automatically, ensuring that the users touch only what they use.

Salient Features

- Superior absorption
- Interfolded to ensure convenient one-at-a-time dispensing
- Low wastage
- Ideal wet strength; more bulk
- Unique brand logo embossing feature ensures quality consistency

Product Specifications

Code	Description	Unit / Roll Size	Packing	Case Count
01410020	Greenlime Super-green Multi-fold Towel	22.5 x 22.5 cms	150 towels	20 sleeves

Kitchen Rolls

Especially suited to the heavy wiping needs of kitchens, this high-absorption tissue product guarantees a super-clean kitchen by delivering a non-messy performance.

Salient Features

- Superior wet strength
- One utility roll = 20 standard kitchen rolls
- Available in 30-300 metres to suit small / large kitchens
- Branded inner core—mark of quality and satisfaction
- Wipes messes, absorbs spills and also preserves the freshness of fruits and vegetables

Product Specifications

Code	Description	Unit / Roll Size	Packing	Case Count
02410028	Greenlime Green Utility Roll / Kitchen Roll	(W)7.5 inch x 300 metres	1 rolls	4 rolls
02410029	Greenlime Green Utility Roll / Kitchen Roll	(W)9.5 inch x 300 metres	1 rolls	4 rolls

Auto-cut Rolls

These rolls are suited to high-traffic washrooms and kitchens. They are more convenient and promote better hygiene. They don't require frequent replenishment and save on precious housekeeping time.

Salient Features

- Extra-thick for user satisfaction
- Low wastage; economical as the length per sheet is pre-cut
- Ideal wet strength

Product Specifications

Code	Description	Unit / Roll Size	Packing	Case Count
02410036	Greenlime Green Auto-cut Roll Towel	225 metres	1 rolls	6 rolls

Multipurpose Wipes

These relatively thicker tissues have multiple uses and are a handy help in keeping articles of daily use and your immediate surroundings spotlessly clean.

Salient Features

- Soft sheets for user satisfaction
- Ideal wet strength
- Cost-effective, pre-cut sheets
- Each tissue is of consistent size and quality

Product Specifications

Code	Description	Unit / Roll Size	Packing	Case Count
05410016	Greenlime Green Multi-purpose Wipes	20 x 20 cms	50 towels/pouch	200 pouches
