

100 Years Of Expertise

Pudumjee Hygiene has 100 years of expertise in speciality paper manufacturing that is best reflected in the imaginative differentiation of tissues. Differentiating factors that lend singularity and uniqueness to each tissue are the base sheet used, the format, number of ply, wet strength, bulk etc. Our hygiene solutions are manufactured to exacting specifications to suit not only their end use but also disposal methods. Hence, our toilet rolls disintegrate in water and towels remain strong in the kitchen even when wet. Facial tissues do not shred and napkins absorb twice their weight in water.

Meeting Global Standards

The use of tissue paper products in contact with food supplies sets higher requirements for the chemical and production processes. This applies to a wide range of tissue products for professional and home use. Careful control of the production process is the key to ensuring high microbiological quality and hygiene standard of the end products. Greenlime towels, napkins, toilet tissues and facial tissues use safe, high-quality food grade additives that are FDA-compliant.

Our tissue products are manufactured using imported or recycled pulp in advanced hands-free manufacturing units using FDA-compliant raw materials. The tissue is totally chlorine-free (TCF), hygienic and bacteria-free, and completely safe to use with food products and on the skin.

Our natural range of towels and tissues is made from 100% recycled fibres derived from high-quality, imported waste-paper grades and processed using environment-friendly hydrogen peroxide in pulp bleaching. We procure our base pulp from sustainable resources and not from wood cultivation, making our tissues environment-friendly.

Our dispensers can be a valuable part of any HACCP plan with mechanical hands-free features preventing cross-contamination. Hazard Analysis Critical Control Point (HACCP) is a global process control system designed to enhance food safety by identifying and preventing physical, chemical and biological hazards in food production.

Being a full member of ISSA, has given us access to global hygiene standard resources and recognition in the hygiene business as the most trusted business partner.

Pudumjee Hygiene has striven to earn prestigious ISO certifications for its units, making it the only tissue company in India with 3 ISO certificates

- ISO 9001: 2000 Certified for our Quality Management Systems (QMS)
- ISO 14001: 2004 Certified for our Environmental Management Systems (EMS)
- ISO 22000: 2005 Certified for Food Safety Management Systems (FSMS)

Raising the Hygiene Bar in Health Care Centres

In health care centres hygiene is of paramount importance. Germs can spread easily, leading to hospital-acquired infection (HAI). Pudumjee Hygiene's range of special solutions ensures cleanliness and hygiene, not just in hospitals and clinics, but also in leisure centres, beauty salons and a variety of other working environments.

Being an ISO-certified company, Pudumjee Hygiene adheres to best Quality, Environment and Food Safety Management Systems. All the inputs for manufacturing and packaging our tissue products are food-grade in compliance with FDA norms, making our products 100% safe on skin and food. ISO certification also opens up our units for secret inspections, keeping us ever-vigilant to serve our customers with assured quality products.

Available All Round The Year

Thanks to our own tissue-manufacturing and converting facilities, we assure all-year-round ready supply of our products and services. We have branch offices in all major cities of India. Our strong and efficient distribution network offers unbeatable service to our customers, making sure they have adequate stocks whenever required. Our unique on-call delivery system ensures we are there to cater to emergency needs of our clients.

Hygienic Disposable Bed Covers

Hygienic Disposable Bed Covers

Hygienic Disposable Bed Covers

This innovative new product—developed after much research and our understanding of the health care industry's needs—is a hygienic, multipurpose, disposable, tissue-based bed cover. It has gone a long way in preventing hospital-acquired infection.

Ideal for the out-patient department and checkup rooms, this one-time, ready-to-use couch roll is a thick, absorbent paper bed cover sheet used in roll form with a preset perforation length, and provides an amazing solution for germ-free and clean bedding. It also frees health care personnel from the onerous task of washing and maintaining dirty beds in high-traffic situations.

Designed for hygiene, cleaning and protection purposes, each roll is shrink-wrapped, and available in 1 ply and 2 ply in varied dimensions.

Salient Features

- Saves daily cleaning and drying costs
- Eliminates contamination from reusable cloth bed sheets
- Use-and-throw, large-sized rolls save human effort, time and maintenance costs
- Superior wet-strength ensures they don't shred even when wet
- Totally chlorine-free manufacturing process and FDA-compliant raw materials make them completely safe on food and skin

Hand Sanitising Solutions

50 ml 500 ml

Greenlime Pump and Pouch Dispenser and Refill

5 litres

Just 2 drops kill 99.9% germs on hands
No soap or water required

Instant Hand Sanitiser

Even visibly clean hands can carry germs and spread infections. Hence, they don't just need to be washed, they need to be sanitised. This sanitiser is particularly useful when one is on the move, and soap and water are not readily available. The 50 ml pocket-packs ensure your hands are 100% safe everywhere. The bulk packs with dispensing pump bottles ensure safe and hygienic enterprises especially in hospitals, clinics and food processing industries. Pudumjee offers a pump and pouch dispensing system for easy and convenient use of sanitisers in hospitals, clinics, wellness centers and workplaces to prevent the spread of infections. Greenlime hand sanitisers are available in a choice of odourless and mild fragrances to appeal to varied consumer groups.

Salient Features

- Just 2 drops kill 99.9% germs on hands
- Enhanced with moisturiser that keeps your hands soft and smooth
- Pleasant fragrance keeps your hands refreshed
- Greenlime Sanitiser is suited for all skin types
- This sanitiser is safe and gentle enough to use several times a day

Missed out spots while cleaning hands
